IRISH SETTLEMENT IS NO NEARER TO SOLUTION

Japanese Crown Prince Takes Over Reins of Government

HIROHITO WAS BEING GROOMED FOR JOB WHEN ON CONTINENT

(By Associated Press)
TOKYO, Nov. 25.—Crown Prince Hirohito has been designated as regent of Japan.
The designation of Prince Hirohito as regent follows the reports that have been in circulation for more than a year that his father, Emperor Yoshihito, was in very poor physical condition and that his continued illness would make such a move necessary.
When the crown prince made his trip through Europe recently it was generally understood that this was the first step in the court arrangements for the accession of the throne.
In May of last year a dispatch to a Honolulu newspaper reported that the emperor was suffering from a mental and physical breakdown.

CORNELL U. WILL PARTICIPATE IN ROSE FESTIVAL

(By Associated Press)
PASADENA, Cal., Nov. 25.—Arrangements were made today by the Tournament of Roses association that the football teams of Cornell University and the University of California will be invited to play the annual New Year's day east-west game at Tournament field here.

FISH LAKE MERGER HAS BIG SHOWING OF OIL AND GAS TODAY

Significant of possible important developments taking place today at the well of the Fish Lake Merger Oil company where the drill is believed to be on the edge of the first oil sand, George A. Foster, vice-president of the Merger company, left early this morning for the well in response to a hurry call from C. W. Taylor received this morning.
In the brief message received at the Merger offices, Taylor indicated that petroleum gas was being encountered in large quantities and that the showing of oil was correspondingly larger. In his message Taylor said:
"Very strong petroleum gas this morning. Think shale cap about finished. Much oil. Don't be surprised to get the big news any minute. Better come out."
Since the addition of the night shift by the Merger people the drill has been dropping without cessation and has been eating up the hard shale at better than 20 feet a day. At last reports, Friday last, the hole was down 1050 feet. Since that time an additional bit for the heavy tool has been received, allowing the sharpening of bits without the usual delay.
With the closing down of the Syndicate well at Fallon, which was at the time the deepest in the Nevada fields, all eyes of Nevada oil enthusiasts are now undoubtedly focused on the Merger well, where it is conceded the state stands its greatest chance of entering the oil production list of the west.
TO MERGE ORGANIZATIONS
At a session of the Nevada Live-stock association at Elko last week it was decided to merge the association with that of the farm bureau, which will be a consolidation of all interests in the stockraising business of the state. This is done to a certain extent to assist in the farm loans now offered by the government. By this merging both farmer and the stockraising business benefits.

ARBUCKLE TO BE EXONERATED SAYS LAWYER

(By Associated Press)
SAN FRANCISCO, Cal., Nov. 25.—Dr. M. E. Rumwell will be placed on the stand today in the Arbuckle trial to testify that Virginia Rappe exonerated Arbuckle for her fatal injuries, it was announced by Gavin McNab, the defendant's chief counsel. Dr. Rumwell was the first physician to give any detailed attention to Miss Rappe after the Arbuckle party.

NOTED SURGEON GIVES HELP TO U. S. CRIPPLES

(By Associated Press)
NEW YORK, Nov. 25.—Cripples in wheel-chairs, automobiles and in crutches stormed the Hospital for Joint Diseases today when Dr. Adolph Lorenz, famous Austrian surgeon, held the first of a series of clinics for the city's deformed. So great was the congestion that the hospital authorities found it necessary to summon police to handle the crowd. Lorenz, a poor man himself, is doing the work free as a mark of gratitude for American aid to Austria's starving children.
The first patient arrived long before dawn, working his painful way up the hospital steps on twisted hands and knees, and crawling inside for a warm place until the noted leader could see him. An hour before the towering gray-bearded surgeon arrived over 200 patients had taken their places in line, mothers and fathers supporting their twisted children, and adults with distorted limbs and backs leaning on the arms of friends, or hobbling along as best they could. Lorenz examined about 100 applicants. Others, eliminated by hospital authorities to number nearly 1000, were told to come back for later clinics.

LOYD GEORGE HAS HOPES OF COMING HERE

(By Associated Press)
LONDON, Nov. 25.—It is understood that Premier Lloyd George still hopes to be able to visit Washington for the armament conference. It is possible that he may go to America before Christmas, it was said today.

EXTRA TROOPS ARE REQUIRED TO HALT RIOTS

(By Associated Press)
BELFAST, Ireland, Nov. 25.—Considerable forces of troops and special police are expected to arrive here today to assist in quelling the disorders. The death list from the series of outbreaks reached 27 last night.

LEFT FINGER MARKS IN GETTING \$12,000

OAKLAND, Cal., Nov. 25.—Police finger print experts today endeavored to establish the identity of a woman and five men who late yesterday overpowered two night watchmen in a large downtown department store here, blew open a safe and two safe cabinets, and escaped with approximately \$12,000.

GOOD RESULTS FROM ROYSTON NOW ASSURED

"The biggest surface showing that I have ever seen in any camp in my entire lifetime," is the way in which one of the oldest miners expresses his opinion of the territory that makes up the wonderful camp of Royston. "It doesn't make any difference where you break off a piece of rock around here," he said to a Bonanza representative yesterday, "you will find it mineralized to some extent, and it is at grass roots, too. See here," and wielding his hammer he showed how true were his words by picking up a chunk not larger than a man's hand with grass roots on one side and as pretty a mineralization on the opposite side as one would want to see anywhere.

CONFESSES TO MAKING BOGUS FRENCH PAPER

(By Associated Press)
ST. LOUIS, Mo., Nov. 25.—G. V. Halliday, whose firm recently went into bankruptcy with liabilities listed at over \$140,000, confessed today, according to the police, that he had counterfeited \$1,500,000 of interim certificates upon the French government and passed \$65,000 of them on St. Louis banks in an effort to liquidate his losses. Harry Turner, editor of a humorously magazine here, and Paul Murphy, magazine collector, are held in connection with the case.
The arrests were precipitated by the reading of an Associated Press dispatch in Tuesday's Post-Dispatch by Frank P. McGill, head of a local printing company, which printed the certificates. McGill communicated with his lawyer, who notified the United States district attorney. The spurious certificates were duplicates of those in a \$100,000,000 issue floated by J. P. Morgan & Co. last June for the French government.

WANTS TO RETURN FOR SON'S ILLNESS

FUNCHAL, Island of Madeira, Nov. 25.—Former Empress Zita of Austria-Hungary, who with her husband is living in exile here, has expressed the wish to return to Switzerland to be present at the operation on her son for appendicitis.

CHRISTMAS TO SEE THE FINISH OF ARMS PARLEY

(By Associated Press)
WASHINGTON, D. C., Nov. 25.—Aristide Briand, premier of France, and head of the French delegation, left Washington yesterday for New York where he called today for home.
Belief is gaining ground among the foreign delegations that the arms conference might adjourn the first fortnight of December to give time to the delegates to go home for Christmas.

ALTO DIVIDE TO SEE WORK BEGIN VERY SHORTLY

It has been stated on good authority that the Alto Divide mine will soon resume operations. This property is one of the most favorably located in the Divide ore zone by reason of its close proximity to its great neighbors, the Gold Zone and Tonopah Divide mines.
The main workings of the Gold Zone and Divide properties are only from 500 to 500 feet from the Alto mines, the working shafts of the three mines being less than 1000 feet apart.
Very important ore-bodies have been recently developed in the Gold Zone, which place it in the position of a regular shipper, while the Tonopah Divide already has the distinction of being a regular producer and shipper.
Since the discovery of ore in the Alto Divide mine, two great ore reserves have been developed, showing the same character of ore with the same values as that being mined by the two neighboring properties.
The operations that have been carried out for the past few months by the Alto Divide have opened the east and west vein on the 400 level by a drift run in a westerly direction. Persistent values running from \$15 to \$175 per ton were found the full distance of the drift. The same tale and sulphide veins that were responsible for such large ore-bodies in the Gold Zone and Tonopah Divide are in evidence in the new Alto vein, making a sure link between the three.
The Alto Divide company has a complete and up-to-date surface plant capable of carrying on heavy development work, and the present management will continue the work already so well started.
There is also talk of the East Divide property, which adjoins the Alto Divide, resuming operations very soon.

FIRST VOLUNTEER FROM NYE COUNTY

L. F. Birdno, who with his wife were called to Tonopah the early part of the week to attend the funeral of Mrs. Grant Welch, sister of Mrs. Birdno, was the first volunteer from Nye county in the late war. He left Tonopah December 17, 1917, and after 15 months in the trenches was one of the first to sail for his home in America. His company was aboard the second transport to leave Brest, France, for New York. He arrived in Tonopah on New Year's day, 1919. His brother-in-law, I. W. Garrett, also was a volunteer from this county, but did not return until some time later. Mr. Birdno was a single man when he volunteered, saying it was his duty and that he might save some married man from being separated from his family. He and his wife departed yesterday for their home at Troy, in the eastern section of Nye county.

PRESENT ATTITUDE NOT SATISFACTORY TO EITHER FACTION

(By Associated Press)
LONDON, Nov. 25.—Negotiations for Irish settlement are feared to be moving on satisfactorily and, according to Irish authorities, there is speculation that the next week may witness a collapse of the more favorable circumstances, small developments. It is stated that (Haber) no longer is presenting a great obstacle, but that the Sinn Fein has refused to accept any proposals to the king, though willing to take on such as an Irish constitution.

NEW ORLEANS CRIPPLED BY DOCK STRIKE

(By Associated Press)
NEW ORLEANS, La., Nov. 25.—The port of New Orleans is completely shut up by a strike of between 12,000 and 15,000 cargo handlers and stevedores who struck in sympathy with the seamen who quit Monday. About 70 ships are in port awaiting cargoes.
TO SUPERVISE WORK ON NORTH DIVIDE EX.
The directors of the North Divide Extension Mining company, have employed Ed Hoyt, of the Divide Extension company, to supervise development work which will be started by a crosscut on the 250 level of the new shaft. In the early mining of Gold Mountain, now known as the Divide, very rich seams of high-grade ore were encountered in the mine shaft on this property, then known as the Gold Zone. The company has begun work in a short time and it goes without saying that another producing property will be added to the Divide district's growing list.

INCREASE SHOWN IN WEEKLY OPERATIONS TONOPAH MINING CO.

The result of operations at the property of the Tonopah Mining company for the week ending November 20 showed an improvement over the report of the preceding week. Tonnage raised from the three shafts was increased by 50, making the total of 1200 tons for the week, divided as follows: Silver Top, 200 tons; Mizpah, 850 tons; Sand Grass, 250 tons. The development work was increased by 251 feet, 107 feet of this being in the Silver Top, 117 feet in the Mizpah and 57 feet in the Sand Grass. The official report follows:
Silver Top Shaft.
"Drift 128 east with on 1 foot of good ore. Crosscut 464 connected with raise 5020. Drift 484 is drifting on the vein cut in crosscut 464. Drift 5024 intermediate shows no change. Drift 5026 intermediate broke into steps 5020. Drift 5026 intermediate west is on 1 foot of mill ore. Drift 621 made the usual progress, with no change to report."
Mizpah Shaft.
"Drift 315 is in crushed, medium-grade quartz. Drift 379 is prospecting the Mizpah fault. Raise 499 has holed into slope 493. Drift 612 made the usual progress with no change."
"Raise 1016 has cut 5 feet of good ore on the Hanging-wall vein above slope 1010. Raise 1161 is on 4 feet of mill ore."

SHIPPING COPPER
Included in a trainload leaving Elko this week was 24 cars of blister copper, which went to the coast, where it will be shipped east via the Panama canal. The copper is to be refined in Baltimore.

BUTLER THEATRE

A drama taken from life

"THE SILVER LINING"

—WITH—

JEWEL CARMEN

A story which deals with the widely divergent careers of two girls, one brought up as a crook and the other as a society belle. From the story by Roland West by the same name.

—TOMORROW—
